

TEAM NAME - DHALAM.AI

When fear is weaponized, Your shield can't wait.

Real-time AI scam triage + Device defense

Anusha Jain • **Abhyudaya Marya** | **Team size: 2**

Google DeepMind | Google Cloud

Startup Buildathon — India 2026

Powered by H2S | nasscom | HEADSTART

Built by people who know both AI and the real world.

A two-founder team combining hands-on Android engineering with enterprise product strategy.

ENGINEERING + ANDROID

Anusha Jain

Co-founder · Systems Architect & Tech Lead

AI Engineer at IBM · RVCE B.E. 2024 · Google Cloud GenAI Exchange finalist · IISc research internship. Built the native Jetpack Compose client, device signals and end-to-end AI integration.

linkedin.com/in/anusha-jain-377773216

STRATEGY + COMMERCIAL

Abhyudaya Marya

Co-founder · Product Strategy & Business Architecture

Assistant Manager at Genpact · ex-Accenture · MBA BITS Pilani · B.E. VIT. Shaped the B2B2C commercial model, bank integration strategy and RBI advisory corpus.

linkedin.com/in/abhyudaya-m-6209b51b3

Two founders fused AI with real-world insight to build Dhalam, your shield against scams.

Problem Statement

A scam can empty an account. The damage rarely ends there.

₹22,495 cr

Cyber-fraud amount reported in 2025[1]

24.03 lakh

Financial-fraud complaints on NCRP in 2025[1]

25% more

Complaints than in 2024[1]
The pressure is growing.

Fear. Lost sleep. Damaged trust.

IIT Madras interviews with 33 victims in five Indian cities describe shame, insomnia and strained family relationships after financial cybercrime.[2]

When someone says “act now”, people need a safe pause.

[1] MHA / PIB, 11 Feb 2026, NCRP & CFCFRMS. Broader cyber-fraud figures; not a social-engineering-only count.
25% = rounded year-on-year growth from 19,18,835 to 24,02,579 complaints. Data is dynamic. [2] IIT Madras, 29 Sep 2026; qualitative study.

Proposed Solution

Dhalam.AI gives people a second opinion before the next risky step.

01

Check the message

Text, links or screenshots. Shared only with your consent.

02

Understand the risk

Warning signs, concern level and ranked safety actions.

03

Review app access

Search permissions, enabled services and access changes.

04

Take the next step

Ask about access, verify independently or export a report.

THE WIN WE ARE BUILDING TOWARDS

Financial

A pause before paying

Social

Clear evidence to discuss

Psychological

Calm guidance in six languages

Built demo features shown above. Benefits are intended outcomes; financial-loss reduction has not yet been measured.

Solution Architecture

One simple journey: pause, check, understand, act.

USER JOURNEY · NATIVE ANDROID DEMO

FUTURE VISION

A scalable, adaptive cyber-resilience ecosystem

Proposed: Pan-India scale · IoT intelligence · In-call triage · Microlearning · One-click reporting · Adversarial readiness

Google DeepMind | Google Cloud

Startup Buildathon — India 2026

Six ways Dhalam protects a user.

Product Capabilities

Multimodal scam triage

Screenshot, text and forwarded-message analysis with clear, bounded verdicts.

Live Android telemetry

Checks for remote-access and screen-capture risk signals.

RBI-grounded guidance

Retrieves trusted fraud advisories and validates citation IDs.

Closed-loop protection

Opens the right settings screen, then verifies the change.

Six-language UX

English, Hindi, Marathi, Bengali, Tamil and Telugu; voice in/out.

Zero-install WhatsApp

Forward a message with CHECK: to get fast triage and the 1930 number.

Google DeepMind | Google Cloud

Startup Buildathon — India 2026

Google AI Tools

Google AI Studio, Google Antigravity and Google Agent Skills (used or planned to be used).

Vertex AI · Gemini Flash — IN USE

Multimodal reasoning and typed outputs

gemini-embedding-001 — IN USE

RBI semantic retrieval in sqlite-vec

Google Cloud Run · Mumbai — IN USE

Serverless FastAPI and WhatsApp webhook

Android Credential Manager — IN USE

Google Sign-In and verified ID tokens

Google AI Studio — IN USE

Prompt and multilingual evaluation workspace

Antigravity — IN USE

Antigravity as a code assistant for prototyping

Google DeepMind | Google Cloud

Startup Buildathon — India 2026

Powered by H2S | nasscom | HEADSTART

Google AI Models

Google AI model(s) used or planned for the proposed solution.

MULTIMODAL REASONING

Gemini Flash

Detects threats across SMS, screenshots and multilingual content.

Structured risk assessments

SYNTHETIC DATA & TESTING

Nano Banana

Generates synthetic scam examples to test features and uncover edge cases.

Broader, safer test coverage

RETRIEVAL / GROUNDING

gemini-embedding-001

Retrieves relevant RBI guidance locally using sqlite-vec.

Source-validated citations

SAFETY & PRIVACY GUARDRAILS

Consent first

User-submitted content only

Image hygiene

Remove EXIF and location data

Constrained output

Validated schema; ranked actions

Human agency

Verify independently; call 1930

From a threat to a clear next step

A fictional “police” demand is flagged, with a practical first action.

FICTIONAL MESSAGE

THE APP RESPONSE · EXCERPT

!

Stop. This looks risky.

This is a classic fake police scam using fear to steal money.

→ End the call immediately and do not transfer any money or share your screen.

Warning signs

! Stay on this video call

A clear first action.

End the call.
Do not send money.
Do not share your screen.

Names the fear tactic.
Highlights the warning sign.

Device access you can explore

Find an app, inspect its permissions, and open findings that need review.

SEARCH & EXPAND

PRIORITIZE THE REVIEW

See what needs your attention.

Search apps and permissions.

Expand a finding.
Review the next step.

Screens show one demo scan.

Google DeepMind | Google Cloud

Startup Buildathon — India 2026

A familiar language. A wider device view.

Bengali interaction on the phone; companion-reported access on Android TV.

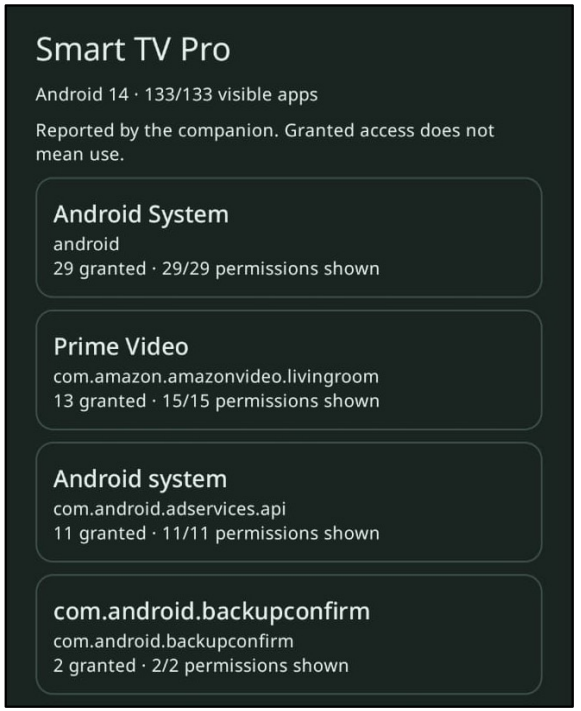

BENGALI INTERFACE

YOUR "DHAL" ON WHATSAPP

ANDROID TV COMPANION REVIEW

Six UI languages

Prompts and key controls adapt to the selected language. Bengali is shown here.

Safety Companion on Whatsapp

A simple WhatsApp check can be the difference between panic and protection

A paired TV, in view

Review apps and grants shared by the TV companion after approval.

TV review requires Dhalam on both supported Android devices and approval to share. Inventory visibility varies by device.

AS-IS (MVP) → TO-BE roadmap

From a working demo to a broader, more proactive defense.

AS-IS · MVP

Today's demo

- User-submitted AI checks
- Searchable device access
- Phone + TV companion
- Six-language interface

Controlled demo

→ **TO-BE · PROPOSED ENHANCEMENTS**

Regional scale

Scale service capacity across India's geographies.

Bite-sized learning

Interactive microlearning for everyday scam awareness.

Broader IoT expertise

Extend risk guidance across connected-device categories.

Real-time, in-call triage

Detection, monitoring and reporting while on call.

One-click cybersecurity mail

Package the incident for user-reviewed sending.

Proactive adversarial drills

Practice scam scenarios before a real attack.

An adaptive defense flywheel for an ever-evolving adversarial landscape.

Validation roadmap to a focused B2B2C product

Consumer evidence and an institutional pilot determine what gets productized.

PHASE 1

Consumer validation

- Recruit 50–100 consenting Android testers, including less technically confident users.
- Measure alert comprehension, protective-action completion and excessive false warnings.

GATE

Useful intervention and acceptable usability.

PHASE 2

Institutional design partner

- Approach one smaller fintech, cyber insurer, employer-benefits program or financial-literacy organization.
- Confirm a problem the institution can define, measure and fund.

GATE: DOCUMENTED PILOT

Partner agrees to a pilot with measurable outcomes.

PHASE 3

B2B2C productization

- Package a narrow SDK or integration API around the pilot's agreed use case.
- Establish privacy and security controls.

BENCHMARK

Added benefit versus the partner's existing protections.

Progression depends on evidence at each gate.

Google DeepMind | Google Cloud

Startup Buildathon — India 2026

Powered by H2S | nasscom | HEADSTART

Commercial model to validate with a partner

Productization follows a documented pilot and evidence of incremental benefit.

Integration hypothesis

Possible use case: device-risk signals before sensitive transfers, with partner-defined step-up verification.

Distribution hypothesis

Offer opt-in WhatsApp triage and partner-led distribution to reach users through trusted channels.

Protected-user SDK

$0.02 / protected MAU / month

Step-up verification

₹0.50 / check

WhatsApp bot

Test acquisition cost and trust

TAM ₹3,600 Cr

India-wide fraud prevention

SAM ₹750 Cr

Vulnerable users + institutions

SOM ₹45 Cr

24-month enterprise ARR ambition

To test: ~7 paise/scan, >85% gross-margin target, and scale-to-zero hosting ($0 idle assumption).
